

# Aadhaar Seeding with NPCI Mapping Form

How to link your Aadhaar to your bank account for DBT payments  
Government of Maharashtra | mahadbt.maharashtra.gov.in

## What is Aadhaar Seeding / NPCI Mapping?

For the Government of Maharashtra to transfer your scheme benefit directly to your bank account, your **Aadhaar number must be linked to your bank account**. This link is registered with **NPCI (National Payments Corporation of India)** — the agency that manages India's inter-bank DBT payment system. This process is called **Aadhaar Seeding** or **NPCI Mapper**.

**WARNING** If Aadhaar seeding is not done, your application will be approved but the payment will FAIL. Complete this step before submitting your application.

## How to Seed Aadhaar with Your Bank Account

Choose one of the methods below:

Method	Steps
Bank Branch (Recommended)	1. Visit your home bank branch. 2. Request an Aadhaar Seeding / NPCI Mapper Form from the bank counter. 3. Fill in: Full name, Account number, Aadhaar number, mobile number. 4. Attach a self-attested photocopy of your Aadhaar card. 5. Submit to the bank officer. Seeding is typically processed within 2-5 working days.
Bank's Mobile App / Net Banking	1. Log in to your bank's mobile app or net banking portal. 2. Look for Services > Aadhaar Seeding or Link Aadhaar. 3. Enter your 12-digit Aadhaar number and confirm. 4. Verify with OTP sent to Aadhaar-linked mobile. 5. Seeding is activated within 1-3 working days.
Aadhaar ATM (AEPS)	1. Visit an ATM that supports Aadhaar-based transactions. 2. Select Aadhaar Banking > Link Aadhaar. 3. Authenticate with fingerprint biometric. 4. The seeding is registered immediately.

## Documents Required at the Bank Branch

- Aadhaar card (original for verification + self-attested photocopy for submission)
- Bank passbook or cancelled cheque
- Completed Aadhaar Seeding form (available at the bank counter)

## After Seeding is Done

After submitting your request, wait **2-5 working days** for the seeding to be processed. You can verify the status using the MahaDBT portal or the NPCI check link. Refer to the separate guide: **Check for Bank Aadhaar Mapping Process**.

**INFO** Only ONE bank account can be mapped to your Aadhaar at a time for DBT. If you switch banks, you must re-seed the new account and ensure the old mapping is removed.
